

3 JUN 1981

MEMORANDUM FOR: Director, Consolidated SAFE Project Office, ODP

STAT FROM:
Chief, Real Estate & Construction Division, OL

SUBJECT: SAFE Power and Space Requirements for the
Phase II Area

1. As you are aware, the design of the SAFE Phase I and Phase II areas in the Headquarters Building was completed simultaneously, based on the information available at that time. The present Phase II design has been reviewed and it is readily apparent that new project requirements will require a partial redesign of the Phase II area.

2. In order to provide GSA the information required to complete the necessary redesign work and not impact completion of the Phase II construction, it is requested that you provide this office with your final power and air conditioning requirements for the Phase II SAFE equipment, the number of modular power consoles to be used, reconfiguration of the Phase II space, and any other modifications to the existing Phase II design you require prior to 30 June 1981. It is also requested that you provide, if possible, proposed future electrical loads in order that any new equipment installed in the future can be accomplished with a minimum of disruption to the SAFE operation and insure that adequate redundancy is provided.

3. This redesign work will obviously require additional funds to complete and this office will notify you of the amount when GSA provides an estimate. If you would like to discuss this issue further, please give me a call.
